

## Team Lead module in BIS

There are five different modules:

1. Screening exams by Tech
2. Diagnostic Exams by Tech
3. Booking Utilization Statistics
4. Radiology Summary
5. Procedures Listing

The screenshot displays the 'Team Lead' module interface. At the top, there is a navigation bar with a home icon, a dropdown menu set to 'Team Lead', a location pin icon with a dropdown set to 'IWK', and a help icon. On the right side of the navigation bar, there is a gear icon and the name 'MCCARTHY, SARAH'. Below the navigation bar, there are five main module buttons arranged horizontally: 'Screening Exams by Tech' (with a group of people icon), 'Diagnostic Exams by Tech' (with a person and magnifying glass icon), 'Booking Utilization Statistics' (with a calendar and gear icon), 'Radiology Summary' (with a chest X-ray icon), and 'Procedures Listing' (with a document and pencil icon). At the bottom of the interface, there is a footer with the text 'Breast Imaging System (BIS)' and 'NS Breast Screening Program' next to a logo. A vertical red 'feedback' button is located on the right edge of the screenshot.

## Screening Exams by Tech's

This module lists the number of screening exams done by technologist. It allows you to scan by time frame and site. It also lists the total number of bookings and no-shows.

\*This module only lists the number of screening exams done, not diagnostic. For the number of diagnostic exams performed by technologist use the "Diagnostic Exams by Technologist" module.

## Booking Utilization Statistics

This listing allows users to run statistics for the number of seats allotted in the Booking Calendar per day and how many of those seats were booked.

Under each Site you can choose between screening, diagnostic, work-up's, ultrasounds and core bookings.

\*Keep in mind that these unbooked seats may represent same day cancellations or changes to the schedule so they won't 100% reflect why the seats might not be booked.

<b>TOTAL:</b>	<b>39/46</b>

## Radiology Summary

This listing displays the total number of screening mammograms a radiologist has reported (PS Total). The screening mammograms are further broken down into the number of double and triple reads they have reported (2<sup>nd</sup> and 3<sup>rd</sup> read).

The last column displays the number of diagnostic mammograms a radiologist has reported.

At the bottom of the screen you will see the number of screening mammograms a technologist has flagged as highly suspicious and the number of unofficial/manual double reads the TA has flagged.
